But other presautions are necessary, without which no amount of Sanitation can exessary without which no amount of Sanitation can everywhere corrected the says that cholera has but little chance among those who keep the digestive organs and the liver, skin and kidneys (the sewers of the body) in healthful operation. Warner's SAFF Remedics are the best scientific Curatives and Preventives, and we cannot too much emphasize the importance of using them now, as a safeguard against any future scourge Much of the common allments are caused, not primarily by bad blood, but by IMPAIRED LIVER AND KINDEYS. This results in blood corruption and injury to the entire system. Remove this impaired action, and most ordinary alments will disappear. Other practitioners have held that extreme liver and kidney disorders are incurable. We, however, by the sewerest tests, have unanswerably proved the contrary.
